

Heterospilus zaykovi nom. nov. for *Heterospilus longicaudatus* Zaykov, 1980, nec Nettleton, 1938 (Hymenoptera: Braconidae)

C. van Achterberg

Achterberg, C. van. *Heterospilus zaykovi* nom. nov. for *Heterospilus longicaudatus* Zaykov, 1980 nec Nettleton, 1938 (Hymenoptera: Braconidae).

Zool. Med. Leiden 66 (10), 31.vii.1992: 197.— ISSN 0024-0672.

Key words: Hymenoptera; Braconidae; Doryctinae; *Heterospilus longicaudatus*; *Heterospilus zaykovi*; Palaearctic.

Heterospilus longicaudatus Zaykov, 1980, nec Nettleton, 1938, is renamed as *H. zaykovi* nom. nov.

C. van Achterberg, Nationaal Natuurhistorisch Museum, Postbus 9517, 2300 RA Leiden, The Netherlands.

Heterospilus zaykovi nom. nov.

Heterospilus longicaudatus Zaykov, 1980: 103-104, fig. 1; Belokobylskij & Tobias, 1986: 32, figs 12-3, -4.

Not: *H. longicaudatus* Nettleton, 1938: 9; [= *Callihormius longicaudatus*; Shenefelt & Marsh, 1976: 1268].

The holotype of *Heterospilus longicaudatus* Zaykov, 1980 (Hymenoptera: Braconidae: Doryctinae) has been deposited in the Nationaal Natuurhistorisch Museum at Leiden. It has been examined ("Bulgaria, ex coll. Zaykov, RMNH Leiden, 1991", "19.8.1977, Rhodopi, Velingrad, leg. A. Zaykov") and proved to be correctly assigned to the genus *Heterospilus* Haliday, 1836. However, it is a junior primary homonym of *H. longicaudatus* Nettleton, 1938 (which in its turn is a nomen novum for *H. longicaudus* Ashmead, 1899, nec *H. longicaudus* (Ashmead, 1893) and is currently included in the genus *Callihormius* Ashmead, 1900.

Therefore I rename this species *H. zaykovi* nom. nov. in remembrance of its collector.
