

ACKNOWLEDGEMENTS AND DEDICATION

Several persons have helped in compiling maps and texts, others have provided vital information. Their assistance is gratefully acknowledged.

Among the overseas contributors I wish to mention especially Prof. D.J. de Laubenfels (Syracuse, U.S.A.) and Mr. D.E. Symon (Adelaide, Australia). Major contributions from inside the institute were provided by Dr. R.D. Hoogland, Miss Wanda Avé, and Messrs. N.A.P. Franken, M.E. Jansen and M.C. Roos.

Information of various kind was received from several persons outside the Rijksherbarium. In alphabetical order they are: Mr. H.K. Airy Shaw (Kew, England), Mr. B.L. Burt (Edinburgh, Scotland), Dr. F.R. Fosberg (Washington, D.C., U.S.A.), Dr. L. Haegi (Sydney, Australia), Mr. R.J.F. Henderson (Indooroopilly, Australia), Prof. A.T. Hunziker (Cordoba, Argentina), Mr. B.P.M. Hyland (Atherton, Australia), Dr. L.A.S. Johnson (Sydney, Australia), Dr. R.W. Johnson (Indooroopilly, Australia), Dr. P. Morat & Dr. H.S. McKee (Nouméa, New Caledonia), Mrs. M. Munoz Schick (Santiago, Chile), Miss B. Perry (Washington, D.C., U.S.A.), Dr. S.H. Sohmer (Honolulu, Hawaii), Mr. W.R. Sykes & Dr. P. Wardle (Christchurch, New Zealand) and Dr. A.G. Wells (Sydney, Australia). From inside the institute help was received from: Dr. P.W. Leenhouts, Prof. C.G.G.J. van Steenis, Dr. J.F. Veldkamp and Dr. W. Vink. Prof. Kalkman kindly read the manuscript and made valuable suggestions.

The drawings were prepared by Messrs. J.H. van Os and C.L. Marks. Mrs. Zonaida Hoek typed out the first draft of the manuscript, which was type-set camera-ready by Miss Emmy van Nieuwkoop in her meticulous way.

Travels abroad, financed by the Rijksherbarium Fonds Professor Lam (Bogor), Ministry of Education (Honolulu), Koninklijke Nederlandse Akademie van Wetenschappen (Christchurch) and privately (Kew and Edinburgh) enabled me to improve several maps.

Finally it gives me great pleasure to dedicate this volume to Mrs. M.J. van Steenis-Kruseman. She has always preferred an unobtrusive place behind the scenes of Pacific Plant Areas and Flora Malesiana, but has nevertheless made major contributions to both. The bibliography of Pacific Plant maps containing some 8000 entries is largely her work.

Leiden, December 1983

M.M.J. van Balgooy
