

IV. LIST OF CO-OPERATING HERBARIA

(cntd from p. 86)

As was pointed out in the first instalment, the management of Flora Malesiana acknowledge collaborating and co-operating institutions; for this purpose a distinction was made between collaborators and co-operators. The former take an active part in the composition of the work (by revising certain families or large groups), the latter give assistance through the loan of specimens, information about collections, bibliographical assistance etc.

COLLABORATING INSTITUTIONS:

The "Laboratorium voor Plantkunde" (Botanical Lab.) of the Rijks Landbouwhoogeschool (National Agricultural College) at Wageningen, will contribute chapters on wood anatomy to the taxonomic revisions as often as will be found possible. The work will be done by Dr. C.A. REINDERS-GOUWENTAK.

Series III of Flora Malesiana (Bryophytes) will be written under the editorship of Prof. Dr. R. VAN DER WIJK, Dept. of Botany, University of Groningen (cf. also, p. 90).

CO-OPERATING INSTITUTIONS:

The Naturhistoriska Riksmuseet, Botaniska Avdelningen, Stockholm, 50, Sweden.

Library and Herbarium of the Botanical Dept of the University of Oxford (Fielding Herb.).

Rijksplantentuin, 236 Koninklijke Straat, Brussels. (Prof. Dr W. Robijns).

Prof. R. Ciferri, Director of the Instituto ed Orto Botanico, Università di Pavia offers collaboration of his institute to students of the Flora Malesiana in matters pertaining to Mycology, Lichenology and Bryology. The Institute has rich collections for comparison and a large reference library.
