

## I. INTRODUCTION.

Bulletin Flora Malesiana will be a medium of communication between all co-editors and cooperators of Flora Malesiana, who are invited to send notes, queries and contributions in concise form. It is for private circulation only.

All matters dealing with difficulties regarding material, inadequacy of information, literature, and suggestions are welcomed to be discussed.

It aims to contain lists and other information on the progress of the flora.

The Bulletin is not intended for the definite printing of revisions. Preliminary keys can eventually be inserted for submission to the judgment of other botanists.

The Bulletin can be extremely useful in promoting mutual understanding and exchange of data, and will form a bond between all botanists engaged in work on the SE Asiatic and Malaysian floras. A continuous system of pagination is preferred. A cover in which the bulletins can be clipped will be supplied. Bulletin Flora Malesiana will appear at irregular intervals; it will be supplied without costs.
