STEENIS-KRUSEMAN, M.J. VAN. Malaysian plant collectors and collections. Koeltz Scientific Books, POB 1360, D-6240 Koenigstein, Federal Republic of Germany. 1985. pp. clii + 639 + (108) + (115). Hard cover. ISBN 3-87429-243-6. DM 280.00 (subscription), DM 350.00 (regular).

This is the long awaited reprint of our 'Green bible', the first volume of the Flora Malesiana Ser. I, 'Cyclopaedia of collectors', now bound together with reprints of the first two Supplements which were published in the Flora Malesiana Series. (Later ones appeared in the Flora Malesiana Bulletin and have not been included in this reprint).

Is it necessary to discuss this book any further? Its usefulness is beyond doubt and a reprint was badly needed; to have the two supplements added makes it even better.

A nice review was given by Stafleu in *Taxon* 35 (1986) 207—208.
