

XVII. BIBLIOGRAPHY
(continued from page 4016)

The entries have been split into five categories: (a) *Algae* — (b) *Fungi & Lichens* — (c) *Bryophytes* — (d) *Pteridophytes* — (e) *Spermatophytes & General subjects*. — Books have been marked with an asterisk.

(a) *Algae* :

- *CRIBB,A.B. Marine algae of the southern Great Barrier Reef. Part I. Rhodophyta. Aust.Coral Reef Soc., Handbook no 2 (1983) 175 pp., 71 pl.
Keys and descriptions, full synonymy.
- GANZON-FORTES,E.T. Laurencia tronoii (Rhodophyta: Ceramiales), a new species from Calatagan, Batangas, Philippines. Kalikasan, Philip.J. Biol. 11 (1982) 404-409, 2 fig.
- GILBERT,W.J. Some marine benthic algae from Christmas Island, Line Islands, Pacific. Atoll Research Bull. no 265 (1983) 1-6.
Species listed.
- HUISMAN,J.M. & G.T.KRAFT, Cymnophycus, a new genus of Ceramiaceae (Rhodophyta) from eastern Australia. Phycologia 22 (1983) 285-294, 23 fig.
- LEE,K.B. & Y.C.WEE, Algae growing on walls around Singapore. Malay.Nat.J. 35 (1982) 125-132, 21 fig.
21 species found, of which 14 blue algae, 6 green algae, 1 diatom.
- TRONO Jr,G.C., R.AZANZA-CORRALES & D.MANUEL, The genus Gracilaria (Gigartinales, Rhodophyta) in the Philippines. Kalikasan, Philip.J.Biol. 12 (1983) 15-41, 11 fig.
Key to 8 species; 2 taxa new for the Philippines.
- & A.E.SANTIAGO, New records of the genus Acetabularia in the Philippines. Natur.Appl.Bull. 23 (1972) 39-46.
6 species reported (4 new records for the Philippines).
- WYNNE,M.J. The current status of genera in the Delessertiaceae (Rhodophyta). Botanica Marina 26 (1983) 437-450.
Key to 83 genera; some new names and transfers.
- YOSHIDA,T. Japanese species of Sargassum subgenus Bactrophycus (Phaeophyta, Fucales). J.Fac.Sci.Hokkaido Univ. ser.V (Bot.), 13 (1983) 99-246, 99 fig. & maps.
Keys to 4 sections and 28 species.

(b) *Fungi & Lichens* :

- AWASTHI,D.D. & M.JOSHI, Lichen genus Peltigera from India and Nepal. Kavaka 10 (1982) 47-62, 19 fig.
Key to 15 species (one new).
- & Shri Ram SINGH, The lichen genus Rhizocarpon (Ram.) Th.Fr. in India. Kavaka 5 (1977) 49-58, 28 fig. — Key to 11 species.

- CARTER,A. Three new species in the genus Chaetomium (Fungi). Canad.J.Bot. 61 (1983) 2603-2607, 9 fig.
Among others 1 species from New Guinea, 1 from the Solomons.
- CHIN FOOK HON, Edible & poisonous fungi from the forests of Sarawak. Part 1. Sarawak Mus.J. 29 (1981) 211-225, pl. XVIII-XXIX.
Descriptions and figures of 41 species.
- *CORNELL,E.J.H. Ad Polyporaceas I. Amauroderma and Ganoderma. Beih. Nova Hedwigia Heft 75 (1983) 182 pp., 31 fig.
4 genera and 44 tropical species (16 neotropical, 28 Australasian); descriptions; 6 new species, several new var. and new comb.; scheme of ancestral tree of Ganodermataceae; notes on Malesian species and key to some Malesian species; largely based on his own collections.
- CUEVAS,V.C. & N.E.SAJISE, Two cellulolytic species of Trichoderma (Hyphomycetes) new to the Philippines. Kalikasan, Philip.J.Biol. 12 (1983) 309-316, 4 fig., 1 tab.
- DANTANARAYANA,D.M., O.S.PERIES & A.de S.LIYANAGE, Taxonomy of Phytophthora species isolated from rubber in Sri Lanka. Trans.Br.Mycol.Soc. 82 (1984) 113-126, 46 fig., 7 tab.
- ELIX,J.A. & P.M.ARMSTRONG, Further new species of Parmelia subgen. Xanthoparmelia (Lichens) from Australia and New Zealand. Austr.J.Bot. 31 (1983) 467-483, 11 fig.
11 new species from S. Australia, some also occur in New Zealand.
- FRISVOLL,A.A. A taxonomic revision of the Racomitrium canescens group (Bryophyta, Grimmiaceae). Gunneria (Kgl.Norske Vid.Selsk.Mus.) no 41 (1983) 181 pp., 52 fig.
A northern hemisphere group, one species going south as far as Vietnam.
- GALLOWAY,D.J. & J.K.BARTLETT, The lichen genus Thysanothecium Mont. & Berk., in New Zealand. Nova Hedwigia 36 (1982) 381-398, 6 fig.
2 species (1 also in Malesia); several reductions.
- *GUZMAN,G. The genus Psilocybe. Beih. Nova Hedwigia Heft 74 (1983) 1-439, 76 plates with 781 fig. (some in col.).
Monograph of 144 species. Chemistry of hallucogenic species.
- HAFELLNER,J. Monographie der Flechtengattung Letrouitia (Lecanorales, Teloschistinaeae). Nova Hedwigia 35 (1981) 645-729, 26 fig., 2 tab.
Key to 15 species, some new and some new combinations.
- HORAK,E. Mycogeography in the South Pacific region: Agaricales, Boletales. Austr.J.Bot. Suppl.Ser. no 10 (1983) 1-41. 7 fig.
75 species selected for demonstrating geographical relationships;
5 new species, 2 new varieties.
- INOUE,M. Japanese species of Huilia (Lichenes) (1). J.Jap.Bot. 58 (1983) 113-128, 8 fig.
Key to 12 species. Also in the Philippines.

- JØRGENSEN, P.M. Distribution patterns of lichens in the Pacific region.
 Austr.J.Bot. Suppl.Ser. no 10 (1983) 43-66, 14 fig. (maps).
 Small number of endemics indicates probably slow rate of evolution;
 long-distance dispersal is likely to have occurred.
- JÜLICH, W. Basidiomycetes of South-east Asia. 2. On Scenidium apiarum, with
a discussion of the nomenclatural status of the genus Hexagonia
Pollini (Hexagona Fr.). Persoonia 12 (1984) 107-117, 4 fig.
 Throughout Indonesia; 14 species accepted in the genus (4 new comb.);
 Hexagona Fr. reduced.
- KAMAL, A.N.RAY & G.MORGAN-JONES, Notes on Hyphomycetes. XLV. Neopericonia,
a new phaeodictyosporous genus from India. Mycotaxon 18 (1983) 15-
18, 1 fig., 1 pl.
 On Pterocarpus.
- KOBAYASI, Y. Keys to the taxa of the genera Cordyceps and Torrubiella.
 Trans.Mycol.Soc.Japan 23 (1982) 329-364, 2 fig.
 Key to all species of Cordyceps (282) and Torrubiella (59). Appendices include a list of 19 allied genera (73 spp.), teleomorph-anamorph connections, host-parasite relationships, in Cordyceps 2 new spp., 5 new comb., a list of synonyms and a list of excl. spp.
- Copelandia papilionacea, a hallucinogenic mushroom. J.Jap.Bot. 58
(1983) 316-318, 2 fig.
 From Bali, on sandy beach.
- KOHLMEYER, J. Geography of marine fungi. Austr.J.Bot. Suppl.Ser. no 10
(1983) 67-76, 2 fig.
 The ranges of 13 Ascomycetes, 2 Basidiomycetes and 2 conidial fungi discussed and the worldwide range of 10 others is plotted.
- KORF, R.P. Cyttaria (Cyttariales): Coevolution with Nothofagus, and evolutionary relationship to the Boedijnopezizeae (Pezizales, Sarcoscyphaceae). Austr.J.Bot. Suppl.Ser. no 10 (1983) 77-87, 2 fig.
 Suggested affinity of Cyttaria with Boedijnopezizeae.
- LIM, G. Nouvelle liste de champignons parasites à Singapour. Bull.Soc.Myc.
Fr. 99 (1983) 127-129.
 List of 34 host plants with their parasites.
- MALLOCH, D.W., K.A.PIROZYNISKI & P.H.RAVEN, Ecological and evolutionary significance of mycorrhizal symbioses in vascular plants (A Review).
 Proc. Nat.Acad.Sci.USA 77 (1980) 2113-2118.
 About 4/5th of all plants form endomycorrhiza, and a number of other tree families ectomycorrhiza (conifers, Betul., Fagac., Dipt., etc.). The number of fungal symbionts of the latter run in the thousands, in contrast with the fungal species richness in endomycorrhiza, which is very low. The latter are mostly in the warm regions, the first in the temperate.
- NAIR, L.N. & S.D.PATIL, Fleshy fungi from Western India. I. Gasteromycetes.
 Kavaka 5 (1978) 19-23, 19 fig.
 17 species listed.

PATWARDHAN, P.G. & C.R. KULKARNI, A contribution to our knowledge of the lichen flora of India. I. Family Thelotremaeae. Kavaka 5 (1977) 1-17, 4 fig.

Keys and descriptions; 4 genera, 40 species (none new).

PEGLER, D.N. Lentinus araucariae, an Australasian member of the L. badius-complex. Cryptog., Mycol. 4 (1983) 123-128, 1 fig.
A new species from Mt Kinabalu, Solomons and New Caledonia.

PETERSEN, R.H. Notes on clavarioid fungi. XVIII. A preliminary outline of Clavulina in Southeastern Australia. Nova Hedwigia 37 (1983) 19-35, 6 fig.
9 taxa described and keyed out.

PIROZYNISKI, K.A. Pacific mycogeography: An appraisal. Austr.J.Bot. Suppl. Ser. no 10 (1983) 137-159.
Brought into relation with geological events in the past.

QUIMIO, T.H. Some unreported Agaricales of Mt. Makiling (Philippines). Nova Hedwigia 38 (1983) 421-432, 3 pl.
15 species newly reported; no novelties.

RAWLA, G.S. & A.M. NARULA, Himalayan Xylariaceae: The genus Penzigia Sacc. & Paol. Nova Hedwigia 38 (1983) 747-756, 3 pl.
3 species described (none new).

ROGERS, R.W. Typification of the species of lichens described from Australian specimens by James Stirton. Austrobaileya 1 (1982) 502-510.

*ROSSMAN, A.Y. The phragmosporous species of Nectria and related genera (Calonectria, Ophioneectria, Paranectria, Scoleconectria and Trichonectria). Commonw. Agricult. Bureaux: Mycol. Papers no 150 (1983) 164 pp., 17 pl., 54 fig.
Key to 53 species (several new); all names listed and evaluated.

RYVARDEN, L. Type studies in the Polyporaceae 14. Species described by N. Patouillard, either alone or with other mycologists. Occ.Pap. Farlow Herb.Crypt.Bot. no 18 (1983) 1-39, 5 fig.
Evaluation of 235 polypores; some new comb. (among them one from Singapore).

SATHE, A.V. c.s. Agaricales (Mushrooms) of South West India. Series 1. Parts I-III. Maharashtra Assoc.Cult.of Sci., Res.Inst., Pune, India: Monograph no 1 (1980) 1-114, illus.
Survey of Kerala, Karnataka and Maharashtra States; in all 75 species, of which 37 are new.

SERUSIAUX, E. Proposal to conserve Baeomyces (Lichenes). Taxon 32 (1983) 646-648.

SINGH, Ajay, Two new species of the lichen genus Parmentaria from South India. Candollea 38/2 (1983) 459-463, 1 pl.

- *SIPMAN, H.J.M. A monograph of the lichen family Megalosporaceae. Thesis, Utrecht (1983) 241 pp., 53 fig. & maps, 5 tab., 24 pl.
A true monograph; 29 species; discussions on geography, ecology, evolution; identification list by countries.
- SMITS, W.Th.M. Dipterocarps and mycorrhiza. An ecological adaptation and a factor in forest regeneration. Fl. Mal. Bull. 36 (1983) 3926-3937, 2 fig.
A vital contribution to the ecology of Dipterocarps sustained by experiments in vitro. Important for regeneration.
- STEVENS, G.N. Tropical-subtropical Ramalinae in the Ramalina farinacea complex. Lichenologist 15 (1983) 213-229, 4 pl., 2 maps.
2 species with some new varieties. Also in Malesia.
- SUGIYAMA, K. & H. YAMAMOTO, Notes on the Laboulbeniomycetes of Borneo II. The genus Rickia. Trans. Mycol. Soc. Japan 23 (1982) 301-311, 1 fig.
6 species, 3 new, 2 new to Borneo.
- THIND, K.S. & J.S. DARGAN, Xylariaceae of India. IV. The genus Daldinia. Kavaka 6 (1978) 15-24, 37 fig.
Details of 6 species; key.
- WALKER, J. Pacific mycogeography: Deficiencies and irregularities in the distribution of plant parasitic fungi. Austr. J. Bot. Suppl. Ser. no 10 (1983) 89-136, 16 fig., 13 tab.
- WATLING, R. & T. YOUNG, A new species of Panaeolopsis Singer. Notes Roy. Bot. Gard. Edinb. 4 (1983) 395-399, 2 fig.
A new species from New South Wales from a formerly bitypic genus in Argentina and Brazil.
- YEH, Kai-wun & Zuei-ching CHEN, The boletes of Taiwan (III). Taiwania 27 (1982) 52-63, 12 fig., 11 pl.
12 species described (none new).
- YEN, J.M. Etude sur les champignons parasites du sud-est asiatique. 40. Champignons parasites de Hong Kong III. Bull. Soc. Myc. Fr. 99 (1983) 217-218.
A new Drechslera (Hyphomycetes).
- & S.-K. SUN, Studies on parasitic fungi from South East Asia. 48. Cercospora and allied genera of Taiwan. VIII. Crypt., Mycol. 4 (1983) 189-198, 5 fig.
4 new species and a new combination.
- (c) *Bryophytes :*
- CROSBY, M.R. & C.R. BAUER, Index Muscorum Supplementum: 1980-1981. Taxon 32 (1983) 670-691.
- DUNCAN, D. & P.J. DALTON, Recolonisation by bryophytes following fire. J. Bryol. 12 (1982) 53-63, 2 fig., 3 tab.
List of known records; data on germination rates of spores and protonemas.

- GROLLE,R. Nomina generica Hepaticarum; references, types and synonymies.
Acta Bot.Fennica 121 (1983) 1-62.
Very important census; 2 new comb.; 1 new genus.
- HASEGAWA,J. Taxonomical studies on Asian Anthocerotae III. Asian species of Megaceros. J.Hattori Bot.Lab. no 54 (1983) 227-240, 4 fig.
General discussion of variability, leading to heavy reduction in number of names; only one species accepted in the area.
- HU, Renliang, A revision of the Chinese species of Entodon (Musci, Entodontaceae). The Bryologist 86 (1983) 193-233, 289 fig.
Key to 1 subgenera and 26 species.
- HURLIMANN,H. Hepaticae aus dem Gebiete des südlichen Pazifik VII. Bauhinia 7 (1983) 259-268, 1 fig.
Some 18 species from New Caledonia and other Melanesian islands.
- INOUE,H. Studies on Taiwan Hepaticae IV. Plagiochilaceae. Bull.Natn.Sci. Mus.Tokyo, ser.B, 8 (1982) 125-144, 4 fig.
Key to 3 species.
- IWATSUKI,Z. Taxonomy of Mosses. In: Advances in Bryology Vol. 1 (ed. W. Schultze-Motel): 233-314, 5 fig. Cramer, Vaduz (1981).
Overview of families.
- KOPONEN,T. & D.H.NORRIS, Bryophyte flora of the Huon Peninsula, Papua New Guinea. I. Study area and its bryological exploration. Ann.Bot. Fennici 20 (1983) 15-29, 6 fig. (maps), 1 tab.
General data on the area; vegetation notes; historical exploration; sites where collected.
- & ----- Ibid. II. Mniateae (Musci). Ann.Bot.Fennici 20 (1983) 31-40, 32 fig.
Key to 7 species.
- KUWAHARA,Y. Metzgeria decipiens (Mass.) Schiffn. (Hepaticae), with a wide geographical distribution. Nova Hedwigia 38 (1983) 603-616, 1 fig., 1 tab.
Full synonymy and range of this almost cosmopolitan species.
- LIN,Shan-hsiung, A taxonomic revision of Phyllogoniaceae (Bryopsida). I. J.Taiwan Mus. 36 (2) (1983) 37-86, 6 fig., 6 pl., 7 tab.
Synopsis and key to species in Orthorrhynchium.
- ONRAEDT,M. Bryophytes du Sri Lanka (Ceylan). VI. Le genre Radula Dum. Cryptogamie, Bryol. Lichénol. 4 (1983) 71-85, 10 fig.
17 species keyed out, 3 new for Ceylon.
- REESE,W.D. & B.C.TAN, The 'petiolate' Calymperaceae: A review with a new species (Musci). Bull.Natn.Sci.Mus., Tokyo, ser.B, 9 (1983) 23-32, 36 fig.
Key to 4 species (2 in Malesia, incl. a new sp. from the Philippines).

- SEPELT, R.D. The status of Riccia areolata and R. longiciliata, two recently described species. Studies on Riccia in Australia. I. *Lindbergia* 9 (1983) 117-120, 2 tab.
Riccia crinita with 2 new synonyms.
- STONE, I.G. Some new and noteworthy records of mosses mostly from Queensland, Australia. *Austrobaileya* 1 (1982) 511-520.
 Some 65 taxa listed with comments.
- Buxbaumia in Australia, including one new species, B. thorsborneae. *J.Bryol.* 12 (1983) 541-552, 4 fig., 1 pl., 1 tab.
 Australasian genus; could occur in New Guinea.
- *SUTTON, B.C. The Coelomycetes. Fungi imperfecti with Pycnidia Acervuli and Stromata. Commonw.Micol.Inst., Kew, Surrey, England (1980) 696 pp., 397 fig.
 A huge monograph; 129 genera; keys to species.
- TAN, B.C. Musci Philippinensis Exsiccati: Fascicle 1. Kalikasan, Philip.J. Biol. 10 (1982) 327-333.
 25 species.
- Ibid. Fascicle 2. Kalikasan, Philip.J.Biol. 11 (1982) 394-399.
 Account of 30 species.
- Checklist of mosses of Mt Makiling (Luzon Island, Philippines). Quart.J.Taiwan Mus. 35 (1982) 135-148, 7 fig.
 211 species reported (1 new from the Philippines), with comments.
- Notes on SE. Asian Dicranodontium (Dicranaceae). *Ann.Bot.Fennici* 20 (1983) 233-235, 5 fig.
 2 new synonyms of *D. fleischerianum*.
- & A.R.ALVAREZ Jr, Additions to the 'Moss Flora of the National Botanic Garden, Philippines'. Kalikasan, Philip.J.Biol. 10 (1981) 165-176, 19 fig.
 13 species added to the published list by R.M.del Rosario.
- & Z.IWATSUKI, Nineteen new records of Philippine mosses. Kalikasan, Philip.J.Biol. 12 (1983) 328-350, 76 fig.
 1 genus and 18 species as new records.
- & T.KOPONEN, Dicranoloma (Musci, Dicranaceae) in Southeast Asia, with special reference to the Philippine taxa. *Ann.Bot.Fennici* 20 (1983) 317-334, 79 fig.
 Key to 6 species; specimens described; comparisons with allied species.
- UDAR, R. & U.S.AWASTHI, The genus Leucolejeunea Evans in India. Proc. Indian Natn.Sci.Acad. B49 (1983) 249-256, 3 pl.
 Key to 3 species.
- & D.KUMAR, Radula pandei, a new Hepatic from South India. *Lindbergia* 9 (1983) 133-136, 2 fig.

(d) *Pteridophytes* :

- BIDIN,A. Pteris semipinnata: an elegant fern from Taman Negara. Nature Malaysiana 8 (1983) 30-31, 6 phot.
Field observations.
- The fern and fern-allies of Carey Island. Malayan Natur. 37 (1983) 13-15.
- CHANDRA,Subhash, Additions to the Indian fern flora, 1960-1980. Kalikasan, Philip.J.Biol. 10 (1981) 177-189.
123 taxa, all listed.
- Notes on some ecological adaptations in drynarioid ferns. Malay.Nat. J. 35 (1982) 133-148, 4 fig., 2 tab.
Relation to environment; 15 species listed with range and habitat; anatomy of fertile and sterile forms; reproduction.
- Check list of ferns endemic to India. Nova Hedwigia 36 (1982) 241-247.
96 species of 43 genera listed as endemic to India.
- CHING,Ren-chang, Taxonomic notes on some N.W.Himalayan ferns. Acta Bot. Austro Sinica no 1 (1983) 17-25. In Chinese.
Various notes; *Athyrium* (3 new spp.), *Lunathyrium*, *Arthromeris* (1 new sp.), *Microsorium*, *Phymatopsis*.
- , You-xing LIN & Su-kung WU, A taxonomic revision on Lepisorus clathratus (Clarke) Ching complex in the Sino-Himalayan region. Acta Bot.Yunnanica 5 (1983) 1-23, 8 fig.
Key to 25 species (several new); also 2 new spp. of *Plagiogyria*.
- & C.H.WANG, Materiae ad floram filicum sinensium. Acta Phytotax. Sinica 21 (1983) 211-218. In Chinese.
Various species of *Bolbitis* listed, *Egenolfia*, *Lomagramma*, *Ctenitopsis* (several new). Infrageneric division of *Tectaria*.
- & Shiew-hung WU, Materials for the Pteris flora of China. Acta Bot. Austro Sinica no 1 (1983) 1-16. In Chinese.
Key to sections; 20 new species and some varieties.
- & Chao-fang ZHANG, New ferns of Zhejiang Province. Bull.Bot.Res., North-eastern For.Inst., Harbin, China 3 (3) (1983) 1-55, 26 fig.
Many new species, many of *Cyclosorus*, *Dryopteris*, *Ctenitis* (1), *Asplenium* and some *Hymenophyllaceae*.
- DAGHLIAN,C.P. & W.L.CREPET, Oak catkins, leaves and fruits from the Oligocene Catahoula formation and their evolutionary significance. Amer.J.Bot. 70 (1983) 639-649, 19 fig., 1 tab.
Modern genera from Oligocene.
- DIXIT,R.D. Seiaginella ornata (Hook. et Grev.) Spring, new to India. J.Bomb.Nat.Hist.Soc. 79 (publ. 1983) 464-465, 1 fig.
A Malesian species.

- HENNIPMAN, E. & M.C. ROOS, Phylogenetic systematics of the Polypodiaceae (Filicales). Verh.naturwiss.Ver.Hamburg 26 (1983) 321-342, 3 fig., 5 tab.
Large discussion on methodology.
- HOLTTUM, R.E. The lypteridaceae. Ident.Lists of Males.Specim. no 62 (Dec. 1982) 1161-1195.
- Species of Cyathea in the Western Pacific related to C. multiflora Sm. and allies in America. Kew Bull. 37 (1982) 383-388, pl. 24, 1 map.
Some Old World species have stipe-scales as some New World species. Key to 8 species of this Old World group; 1 new sp. from Manus I. (New Guinea).
- HSIEH, Yin-tang, Three new species of Arachniodes Blume from Yunnan. Acta Bot.Yunnanica 5 (1983) 55-58, 1 fig.
- IWATSUKI, K. & M. KATO, Additions to the enumeration of East Kalimantan pteridophytes 1. Acta Phytotax.Geobot. 34 (1983) 55-65, 2 fig.
Additions listed; a new remarkable species of Lindsaea described; 1 new species of Vittaria.
- & ----- Additions to the enumeration of East Kalimantan pteridophytes 2. Acta Phytotax.Geobot. 34 (1983) 130-141, 7 fig.
A list of records in various families; 4 new species in Thelypteris (Coryphopteris Holtt.) and new comb., and a new name in Lindsaea.
- , ----- , M.OKAMOTO, K.UEDA & D.DARNAEDI, Botanical expedition in East Kalimantan, during June 15 and September 15, 1981. In: T. Hidaka (ed.), Taxonomical and evolutionary studies on the biota in humid tropical Malesia, with references to the diversity of species (1983) 31-69.
A detailed report, especially with many names of ferns, of the montane zone. Added are a comparison of the fern flora of Mt Kinabalu and Kalimantan; a note on rheophytic ferns and conservation of the forest.
- KAR, R.K. On the original homeland of Ceratopteris Brongn. and its palaeogeographical province. Geophytology 12 (1982) 340-341.
Fossils and recent range.
- KHULLAR, S.P., S.S.SHARMA & P.SINGH, The Thelypteridaceae of W. Himalaya. Nova Hedwigia 38 (1983) 617-667.
Keys, synonymy; 14 genera, 67 species; no novelties.
- KONG, Xianxu, Notes on the ferns of Sichuan. Acta Bot.Yunnanica 5 (1983) 355-360, 2 fig. In Chinese.
Several notes, incl. a new species in Asplenium and Aleuritopteris.
- MARKHAM, K.R., N.A.MOORE & D.R.GIVEN, Phytochemical reappraisal of taxonomic subdivisions of Lycopodium (Pteridophyta-Lycopodiaceae) based on flavonoid glycoside distribution. New Zeal.J.Bot. 21 (1983) 113-120, 4 fig., 2 tab.
Phylloglossum indistinct from Lycopodium.

- MITSUTA,S. Studies in the venation and systematics of Polypodiaceae. I.
Venation (1). Mem.Fac.Sci.Kyoto Univ., Biol.ser. 8 (1983) 123-150,
 355 fig.
 Extensive survey, data for each genus.
- MUHAMMAD,Haji, Ferns of Marattia family. Nature Malaysiana 7 (3) (1982)
 36-39, 14 col.phot.
 Notes on various species of this fern family.
- NAKAIKE,T. Nomenclatural study in the Pteridophytes from Japan and the adjacent regions. I. Bull.Natn.Sci.Mus.Tokyo, ser. B, 9 (1983) 75-84. In Japanese.
 Various notes.
- OHBA,H. Miscellaneous notes on ferns. Studies on the plants of Isl. Minami Iwojima (Japan) (2). J.Jap.Bot. 58 (1983) 23-27, 1 fig.
 Notes on 7 species.

Subdivision of genus; many new species; no index.

CHANG, Shao-yun & Pui-cheung TAM, New species on genus Balanophora. Bull. Bot.Res., North-Eastern For.Inst.Harbin, China 3 (1983) 141-145, 2 fig.
From Yunnan.

CHANG,Wen-jin & Lian-de SHEN, The genus Hemsleya Cogn. in Sichuan. Acta Phytotax.Sinica 21 (1983) 182-193, 4 fig. In Chinese.
Key to 8 species (4 new).

CHEN,Cheih, On the genus Osbeckia Linn. of Melastomataceae from China. Guihaia 2 (1982) 181-188, 1 fig.
Key to 12 species.

----- On Medinilla Gaudich. of China in relation to the drift of the Indian plate. Acta Phytotax.Sinica 21 (1983) 416-422, 1 map. In Chinese; English summary.

An origin in the Upper Cretaceous in southern Gondwanaland is postulated. A survey of the Chinese species is given. Pseudodissochaeta Nayar is placed in the synonymy by lack of differences in the depth of the extra-ovarian chambers and pollen. The first feature is of specific value in the tribe, while the second offers no distinctions at all. The genera seem distinct enough, however, by the leaves and structures of the anthers, the usual characters in the alliance.—J.F.V.

CHEN,Chia-jui, A revision of the genus Urtica in China. Bull.Bot.Res., North-Eastern For.Inst.Harbin, China 3 (1983) 104-126, 1 fig. In Chinese.

Key to 16 species.

----- New taxa of subtrib. Oreocnidinae C.J.Chen (Urticaceae) from China. Acta Phytotax.Sinica 21 (1983) 473-478, 1 fig.
Oreocnide (4 spp., 1 new), Debregeasia (2 n.spp.).

CHEN,Ming-hong, Zhao-chen KONG & Ye CHEN, On the discovery of palaeogene flora from the western Sichuan Plateau and its significance in phyogeography. Acta Bot.Sinica 25 (1983) 482-491, 2 fig. In Chinese.
Macrofossils from the Eocene. In this paper Eucalyptus is for the second time reported from W.Central China (c. 28-30°N); an ample description is supported by drawings of leaf, buds and top of fruit. It looks certainly Myrt. In the same paper is also mention of a Banksia (Proteac.) descr. by Berry; other species are normally north hemisphere.

CHEN,Pang-yu, A new species of Picrasma Bl. from China. Acta Bot.Austro Sinica no 1 (1983) 71-73, 1 fig. In Chinese.

A proposed split from P. javanica; but the three main differences noted are all included in the definition of that species in Flora Malesiana by H.P. Nooteboom.

CHEN,Sing-chi, Two new species of Smilax from Yunnan. Bull.Bot.Res. North-Eastern For.Inst.Harbin, China 3 (3) (1983) 111-115, 2 fig.

CHEN,Tzu-tsung & H.OHASHI, Two forms in Desmodium laxiflorum DC. (Leguminosae) J.Jap.Bot. 58 (1983) 263-269, 2 fig.

A new subsp. parvifolium Ohashi & Chen which also occurs in SE.Asia and Malesia.

CHEN, Wei-chiu, A preliminary study on the genus Wendlandia in China (cont.). Acta Phytotax. Sinica 21 (1983) 386-403, 9 fig., 1 tab.
23 species treated in this 2nd instalment (7 new); no key; in all
31 species recognized in the genus Wendlandia (Rubiaceae).

CHENNAVEERAIAH, M.S. The Palms. Tenth Birbal Sahni Memorial Lecture. The Palaeobotanist 27 (1981) 314-331, 5 tab.

Tour took 8 months; diary matter condensed in 24 chapters with many illustrations.
- HENTY,E.E. Grasslands and grassland succession in New Guinea. In: J.L.Gressitt (ed.), Biogeography and ecology of New Guinea. Junk Publ., The Hague, Boston, London (1982) 459-473, 10 fig.
- HEPBURN,A.J. Glenniea philippinensis, Sapindaceae: a rare fruit tree from Tenom, Sabah. Malayan Natur. 36 (3) (1983) 9-10, 1 phot.
The first record from Borneo of this rare tree.
- HEYLIGERS,P.C. Semi-deciduous scrub and forest and Eucalypt woodland in the Port Moresby area. In: J.L.Gressit (ed.), Biogeography and ecology of New Guinea. Junk Publ., The Hague, Boston, London (1982) 437-457, 10 fig., 1 tab.
- HEYWOOD,V.H. The mythology of taxonomy. Bot.Soc.Edinb.Trans. 44 (1983) 79-94.
A curious example of mythology of the author's state of mind, bristling with unwarranted criticisms on the state of scientia amabilis.
- HIEPKO,P. Opiliaceae. Flora Malesiana I, 10 (1984) 31-52, 17 fig.
7 genera, 9 species.
- HILL,R.S. Evolution of Nothofagus cunninghamii and its relationship to N. moorei as inferred from Tasmanian macrofossils. Austr.J.Bot. 31 (1983) 453-465, 29 fig., 1 tab.
Shared probably a common ancestor in Early Tertiary.

- *HIROE,M. Umbelliferae of World. Ariake Book Co., Matsuo Biru, Hongo, Bunkyo-ku, Tokyo City (1979) 2128 pp., 218 fig.
A very large generic monograph (220 genera, 3500 species); 8 keys are given to identify the genera; some critical notes on this huge work are made by P.Gorovoy in Nordic J.Bot. 3: 346.
- HO,Feng-chi, Notes on the genus Ormosia of Taiwan. J.Taiwan Mus. 36 (2) (1983) 1-5, 3 fig.
Key to 3 species (one introduced). Legum.
- HOLMES,W.B.K., F.M.HOLMES & H.A.MARTIN, Fossil Eucalyptus remains from the Middle Miocene Chalk Mountain Formation, Warrumbungle Mountains, New South Wales. Proc.Linn.Soc.N.S.W. 106 (1983) 299-310, 3 fig., 2 tab.
- *HOMMEL,P.W.F.M. Ujung Kulon vegetation survey. Preliminary results, including a landscape-ecological map (scale 1:75,000) (1983) — See Review on page 67.
- HOOGLAND,R.D. Notes on some Hibbertia species (Dilleniaceae). Austr.Syst. Bot.Soc.News1. 34 (1983) 3-4.
Notes on 4 species with synonymy.
- HOPE,G. The vegetational changes of the last 20,000 years at Telefomin, Papua New Guinea. Sing.J.Trop.Geography 4 (1983) 25-33, 3 fig., 2 tab.
Results of 2 m pollen profiles. Changes reflect three clearances in the past at 1500 m.
- HOU,Ding, Florae Malesianae Praecursores LXV. Notes on Aristolochiaceae. Blumea 29 (1983) 223-249, 8 fig.
Aristolochia singalangensis n.sp., the only Mal.sp. in which the fruit dehisces from the apex. Notes on 18 other species and on the butterfly relationship of Aristolochia. Finally a note on pollination in Thottea in which germinated pollen grains were observed in dehisced anthers.
- Aristolochiaceae. Flora Malesiana I, 10 (1984) 53-108, 18 fig.
Thottea (Apama) 22 spp., Aristolochia 28 spp. In Thottea apart from the key spotting characters are listed; in Aristolochia besides the general key also 5 keys for island groups. Thottea is almost as rich in species in Borneo as in Malaya. In Aristolochia Sumatra is as rich as Borneo, Philippines and New Guinea. The status of Pararistolochia is doubtful.
- HOWCROFT,N.H.S. Contributions to the orchid flora of the Araucaria forests in New Guinea. 4. Coelogyne beccarii Reichb.f. The Orchadian 7 (1983) 154-157, 3 fig.
Common in New Guinea and Moluccas.
- HSIEH,Yin-tang, The taxonomy of Arachniodes Bl. in China (Orchidaceae). Bull.Bot.Res.North-Eastern For.Inst.Harbin, China 3 (1983) 73-81.
In Chinese.
Key to 11 series.

- HSU, Yunchun & Bising SUN, Several new species of Fagaceae from Yunnan.
Acta Bot. Yunnanica 5 (1983) 333-342, 4 fig. In Chinese.
New species of Lithocarpus.

phostigma (Pandanaceae) et sa signification taxonomique, phylogé-
nique et évolutive. Beitr. Biol. Pflanzen 57 (1982) 15-83, 106 fig.
Descriptions of male flowers of 15 species in 8 sections of the sub-
genus; also pollen descr. In 4 spp. anthers are introrse; anatomical
details.
- Carpellobodes or staminodes? Problems in the genus Pandanus (Pandan-
ceae), and their taxonomic significance. Bot. J. Linn. Soc. 87 (1983)
177-192, 24 fig., 1 tab.
Both organ types are of taxonomic value.
- The taxonomic significance of the anther structure in the genus
'Pandanus' (Pandanaceae) with reference to 'Pandanus' sect. 'Mar-
tellidendron'. Webbia 37 (1983) 141-148, 9 fig.
- *HYLAND, B.P.M. A revision of Syzygium and allied genera (Myrtaceae) in
Australia. Austr. J. Bot., Suppl. Ser. no 9 (1983) 1-164, 56 fig. incl.
also 44 maps.
A substantial revision, profusely illustrated; keys to genera and
species; 5 genera (Acmena, 2 spp.; Acmenosperma, 2, 1 new; Eugenia,
1; Syzygium, 52, 16 new; Waterhousea n.g., 4, 2 new).
- HYMAN, E.L. Smallholder tree farming in the Philippines. Unasylva 35
(1983) 25-31.
2 alternative programs.

- INOUE,K. Notes on Platanthera (Habenaria) from Yunnan and northern Burma described by W.W.Smith. J.Jap.Bot. 58 (1983) 306-315, 9 fig.
Critical notes on 6 species.
- IRAWATI, Langkah baru pelestarian anggrek (A new step in orchid conservation). Bul.Kebun Raya 5 (2) (1981) 43-45.
- *IRWIN,H.S. & R.C.BARNEBY, The American Gassiinae. A synoptical revision of Leguminosae tribe Cassieae subtribe Cassiinae in the New World. Mem.N.Y.Bot.Gard. 35 (pt 1 & 2) (1982) 1-918, 53 fig.
A very large work; keys, descriptions etc. Three genera are distinguished: *Cassia* (14 spp.), *Senna* (202 spp.) and *Chamaecrista* (3 spp.); many species are also known as ornamentals or introduced in Old World tropics.
- IVANJUKOVICH,L.K. A review of the species of the Nervosa of the genus Sorghum (Poaceae). Bot.Zj.USSR 68 (1983) 1086-1089. In Russian.
Key, descriptions, one species in the Philippines: *S. splendidum* (Hack.) Snowd.
- IWATSUKI,K., M.KATO, M.OKAMOTO, K.UEDA & D.DARNAEDI, Botanical expedition to East Kalimantan, during 15th June and 15th September 1981. In: T.Hidaka (ed.), Taxonomical and evolutionary studies on the biota in humid tropical Malesia, with reference to diversity of the species: 31-69, fig. 6-20, 1 map. Dept.Zoology, Kyoto Univ. (1981).
Botanical description of trips in lowland rainforest; list of some Magnoliaceae; first find in Borneo of *Cladopus* (Podost.) and a new *Viola*; resemblance of fern flora of Kalimantan and Kinabalu; rheophytic ferns; conservation.
- JACOBS,M. Some botanical comments in relation to the MAB-project in Kalimantan Timur. Trans.2nd Intern.MAB-IUFRO Workshop on Trop.Rainforest Ecosyst.Research, Oct. 1978. Special Report no 2 (1979) 101-105.

NG,F.S.P. The padang of Gunung Tahan. Nature Malaysiana 7 (2) (1982) 22-25, 11 col.phot.

Botanical tour report to this famous summit.

*----- & C.M.LOW, Check list of endemic trees of the Malay Peninsula. Research Pamphlet no 88 (1982) 1-94, FRI, Kepong. M\$ 3.

Selected from the 388 genera thusfar revised in the Tree Flora of Malaya (82 families, 17 still wanting). In all 654 endemic spp., out of 2398, that is 27.3%. Endangered are 343 spp. Several are restricted in distribution, e.g. 66 occur only in Perak, the majority of which have not been observed since 1940. It is the tragedy of the fast disappearing jungle! Of many other species the fate hangs in the balance.

NGUYEN KHAC KHOI, Conspectus generis Scleria Berg. (Cyperaceae) Florae Vietnami. Nov.Syst.Plant.Vasc. 19 (1982) 45-50.

23 species listed; no novelties.

NGUYEN TIEN HIEP & G.P.YAKLOVLEV, Generis Rubus L. (Rosaceae) species novae e Vietnamc. Nov.Syst.Plant.Vasc. 19 (1982) 108-114.
5 new species.

----- & ----- Additions to the flora of the Rosaceae of Viet-Nam. Bot. Zj.USSR 68 (1983) 1521-1528.
Census of species; no novelties.

Amongst others key to subspecies of *Barleria prionitis*. Some new combinations in *Peristrophe*, *Isoglossa*.

WU, Cheng-yih & Shu-kun CHEN, A study on the genus Gynostemma Bl. (Cucurbitaceae) from China. Acta Phytotax. Sinica 21 (1983) 355-369. In Chinese. Abstract in English.

Key to 10 species (4 new spp., some new comb.).

*WIJNANDS, D.O. The botany of the Commelins. A taxonomical, nomenclatural and historical account of the plants depicted in the Moninckx Atlas and in the four books by Jan and Caspar Commelin on the plants in the *Hortus Medicus Amstelodamensis* 1682-1710 (1983) — See Review on page 76.

YAACOB, T.Mohd.Nazim & W. & H.CORLEY, Focus on Johore. Malayan Natur. 37 (1) (1983) 23-29, 3 fig.

Flora and fauna (very brief) in 15 sites in Johore (Malay Peninsula); few plant names.

YAMANOI, T. Presence of Sonneratiaceous pollen in Middle Miocene sediments, Central Japan. Review Palaeobot.& Palynol. 40 (1984) 347-357, 3 pl.

A new species of *Florschuetzia*, closely related to *Sonneratia*, or even its fore-runner. Suggests a warmer climate in Middle Miocene.

YAMAZAKI, T. Taxonomic review of the Moraceae from Japan, Korea, Taiwan and adjacent areas (1). J.Phytogeogr.& Taxon. 30 (1982) 61-73, 7 fig. Partly in Japanese.

Keys to 7 genera and species, *Ficus* excepted.

----- New or noteworthy plants of the Scrophulariaceae from Indo-China (7). J.Jap.Bot. 58 (1983) 14-17, 2 fig.

3 records (1 new species in *Torenia*, 1 new name in *Pedicularis*) for Thailand.

----- Ditto (8). J.Jap.Bot. 58 (1983) 46-50, 2 fig.

A new *Centranthera* from Indochina and notes on 4 other Scroph.

----- On Hedyotis strigulosa Bartl., H. coreana Lévl. and H. biflora (L.) Lamk. J.Jap.Bot. 58 (1983) 281-286, 1 fig.

Key to these 3 species. Of *H. strigulosa* 3 varieties, of which one also in Malesia.

YANG, Jun-liang, New species of Gramineae from Sichuan. Acta Bot.Yunnanica 5 (1983) 47-53, 5 fig.

Of *Agrostis*, *Calamagrostis* and *Tripogon*.

YANG, Xi-ling, New taxa of Tripogon and Aeluropus. Acta Bot.Yunnanica 5 (1983) 72-74, 1 fig.

2 new species (Gram.).

YAP, S.K. Amesiodendron and Litchi (Sapindaceae). New records for the Malay Peninsula. Gard.Bull.Sing. 36 (1983) 19-24, 1 fig., 3 pl.
Both genera represented by 1 species.

----- & S.M.WONG, Seed biology of Acacia mangium, Albizia falcata, Eucalyptus spp., Gmelina arborea, Maesopsis eminii, Pinus caribaea and Tectona grandis. Malaysian For. 46 (1983) 26-45, 11 fig., 9 tab.
Description of germination rates and storage.

ZARUCCHI, J.L. & P.F.CANNON, (692) Proposal to conserve Urnularia Stapf (1901) (Apocynaceae) against Urnularia P.Karsten (1866) (Fungi).
Taxon 32 (1983) 306-307.

ZAVADA, M.S. Comparative morphology of monocot pollen and evolutionary trends of apertures and wall structures. Bot.Review 49 (1983) 331-379, 57 fig.

New ultrastructural data on 30 taxa of 18 families. Matter reviewed for all families and evolutionary trends traced.

ZHAO, Huiru, New grasses in Chinese Ischaemum L. Acta Bot.Yunnanica 5 (1983) 343-354, 5 fig. In Chinese.
Several new species and varieties.

ZHONG, Shili, Five new grass species in Sichuan. J.Southwestern Agric. Coll. 1/4 (1982) 75-85, 4 fig. In Chinese; Latin descr.
New species in Pennisetum, Spodiopogon, Phacelurus, Arthraxon, Miscanthus. The Arthraxon seems to be misplaced in view of the paleate lemmas, the male lower floret and the upper bifid lemma with an awn from the sinus. Schizachyrium? — J.F.V.

ZHU, Zheng-yin, A new species of Tylophora from Sichuan (Asclepiadaceae). Bull.Bot.Res.North-Eastern For.Inst.Harbin, China 3 (1983) 153-155, 1 fig.
