

L I T E R A T U U R

Van de heer J.E. Lousley te Londen ontvingen wij een gedrukt verslag van de in 1956 door de Botanical Society of the British Isles gehouden conferentie, die als onderwerp had: Progress in the Study of the British Flora (uitgave B.S.B.I., c/o Dept. of Botany, British Museum, Natural History, Cromwell Road, London S.W. 7).

De in dit verslag voorkomende onderwerpen zijn de volgende:

Tutin, T.G., Introductory Remarks.

Raven, C.E., The Early Development of a Knowledge of the British Flora.

Lousley, J.E., The Contribution of Exchange Clubs to Knowledge of the British Flora.

- Dony, J.G., The Place of the Local Flora in the Study of the British Flora.
- Richards, P.W., The Progress of the Biological Flora.
- Jones, Keith, Some Aspects of Plant Variation: The Grasses.
- Whitehead, F.H., The Importance of Experimental Ecology to the Study of the British Flora.
- Rose, Francis, The Importance of the Study of Disjunct Distributions to Progress in Understanding the British Flora.
- Valentine, D.H., Development of Knowledge of the British Flora in Relation to North Temperate Floras.
- Walters, S.M., Distribution Maps of Plants. -- An Historical Survey.
- Moore, D.M., The Status of Viola lactea (Exhibit).
- Bradshaw, A.D., Natural Hybridization of Agrostis stolonifera and A. tenuis (Exhibit).
- Bradshaw, Miss M.E., Alchemilla vulgaris L. agg. in Britain (Exhibit).
- Lacey, W.S., A Comparison of the Spread of Galinsoga parviflora and G. ciliata in Britain (Exhibit).
- Goodway, K.M., The Species Problem in Galium pumilum (Exhibit).
- Gay, Peter A., Distribution and Variation of Erica mackaiana (Exhibit).
